

8.2024

Antonio E. A. Longo
 Professore Ordinario
 Dipartimento di Architettura e Studi Urbani _ Politecnico di Milano
 Email: [REDACTED]

PROFILE

Antonio Longo is a full Professor in the Department of Architecture and Urban Studies (DASTU) and Coordinator of the MSc in Landscape Architecture, Land Landscape Heritage at the School AUIC in the Politecnico di Milano. He graduated in Architecture and has been a Professional Architect and Urbanist since 1992. Currently he teaches, conducts research and practices design focusing on urban planning, urban design and landscape design.

Born in Milan in 1966, he graduated from a Classical High School in 1985. He enrolled in the faculty of Architecture in 1985, combining his studies with internship activities at national and international Practices (A.Cendron, Pentagram Design London, B.Secchi). Between 1992 and 1993 he carried out civil service at the welfare office of the Municipality of Rodengo Saiano (BS). He graduated with honors at the Politecnico di Milano in December 1992 with a thesis on the open spaces of the "diffused city" (supervisor Patrizia Gabellini), then until 1995 he collaborated with the Studio of Bernardo Secchi and Paola Viganò (plans and projects in Italy and in Flanders 1992-1995).

In 1995 he won a scholarship for international specialization and moved to Germany at the IRPUD, Institut für Raumplanung at the University of Dortmund, for a one year of research fellowship (1995/96) focusing on territorial strategies (IBA Ruhr) and the German tradition of landscape and garden design and planning. In 1996-1999 he attended a PhD in Territorial Planning (joint faculties of Milan, Turin and Venice), obtaining the title of PhD in 2000 with a thesis on the relationship between urban and landscape planning and the practice of drawing and representation.

In his work he combines design practice with research activity: between 1996 and 1998 he directed the Planning Office of the city of Seregno (MB) developing a land use plan, a structural masterplan and various urban transformation projects and landscape projects subsequently implemented. Later he carried out an intense design and research activity both as a freelancer and at the DiAP (now DASTU) of the Politecnico di Milano. Between 1997 and 1998 he collaborated, as a board member, in the management of a large historical monumental complex including its park (Villa Contarini in Piazzola sul Brenta) where he promoted the recovery and reuse of the Villa and the Park and contributed to the management plan.

In 2007 he founded Ubi Studio srl, a company formalized in May 2008 together with Alessandro Ali, where he carries out scientific consultancy activities within the limits defined by the university framework and the University rules.

As research fellow, from 2002 to 2006, he combined studies on the design of open spaces and landscape with a specific interest in the forms of drawing both in research and in teaching, teaching as adjunct professor (professore a contratto) from 2000 to 2008 "Technique and design of the Plan" at the Bachelor of Urbanism.

Between 2001 and 2003 he was adjunct professor of *Landscape Architecture* in the *Urban Planning Laboratory* at the Faculty of Architecture of Ascoli Piceno, University of Camerino.

In 2008 he won the position of Assistant Professor in Urban and Territorial Planning and Design and focused his teaching activity on urban planning studios/workshops.

In 2014 he obtained National Scientific Qualification as Associate professor. Winner of a public competition in 2014, he has subsequently become Associated Professor at DASTU of the Politecnico di Milano.

In 2021 he obtained National Scientific Qualification as Full Professor.

He carries out teaching activities by coordinating and participating in Integrated Design Studios as part of the Bachelor of Science of Architecture, the MSc in Urban Planning and Policy Design.

In 2017 he participated in the conception and the accreditation process of the new master's degree course in Landscape Architecture, Land Landscape Heritage which he coordinated for the three-year period 2018-2020, and has been re-elected for the three-year period 2021-2023.

He teaches at the double degree program of the Joint School of Design promoted by the Politecnico di Milano and by Xi'an Jiaotong University (XJTU) (Planning in Historical Context Studio 2020, 2021).

He is a lecturer for the Master in Global Health promoted by the State University of Milan (SDG module 2020, 2021).

He is Member of the PHD teaching committee in Urban Planning Design and Policy.

His research themes concern the role of the design of open spaces and landscape in the reorganization and regeneration of contemporary territories, the transdisciplinary composition and the forms of the project in the processes of regulation, transformation and land and landscape management and design, the relationship between landscape and infrastructures, the role of parks and water in the urban planning of cities.

The landscape is considered as a transdisciplinary field capable of bringing together - in a humanistic as opposed to a deterministic way - different knowledge, skills and traditions - often distinct and separate, sometimes conflicting - on issues relevant to the city and the territory. In this sense, the relationship between representation, and landscape are part of a common research path. This transdisciplinary approach has led him to concentrate the research activity more on original experiences with a strong link to the territorial and applicative dimension, characterized by mixed academic, institutional and associative partnerships.

The coordination and direction of the MSc in Landscape Architecture has also rapidly assumed a strongly international character (by origin and interests of the students, and has become an important field of experimentation in the collaboration of skills and knowledge. This activity includes the participations and the contents dealt with at the recent IFLA and ECLAS conferences, and the delegation to Uniscap.

The activities where his role is scientific manager and designer at DASTU are developed both in the context of consulting and applied research agreements with Public Administrations and private individuals and in the context of co-financed research contracts (Provinces, Regions, European Union) or private foundations (in particular the Cariplo Foundation). The research is mainly developed in consolidated partnerships and as a result of competitive procedures where he was the promoter and manager.

The design themes deal with large-scale strategic design (strategic schemes for Turin, Pedemontana Lombardia motorway, Esino river valley, North Milan) to landscape design on a local scale (municipal plans of Castelli Calepio, Cinisello Balsamo, San Donato Milanese, Jesi), to the ecological and systemic analysis and design of complex landscapes (open spaces of Martesana and Villoresi, of the Middle Olona, ecological network of the Lambro River, gardens of the Milanese Metropolitan City, Lombard farmhouses and mountain pastures), and also include consultancy for the design and management of urban landscape areas (implementation of the Grande Parco Forlanini park, Ponte Lambro, Parco Lambro sectors as implementation of the ecological network of Lambro Milanese, ERSAF leader; project for the water meadows ("marcite") of the city of Norcia (PG).

The contents of the research is documented in volumes, essays and articles in which documentation of the project action and reflection are closely related

Since 2015 he has promoted the collaboration of landscape and territory issued between the Politecnico and the University of Milan through the Bioregione project (Grant from Fondazione Cariplo), the European Open Agri project (UIA Urban Innovative Actions _ Lead Partner of the Municipality of Milan). This line of collaboration has also fed and directed the formation of the new degree course in Landscape Architecture through a specific didactic and research collaboration agreement. In this context, he currently participates in the promotion of the observatory on agroecology and the AIDA association (Italian Agroecology Association) launched at the Università Statale initiated by Prof. Stefano Bocchi, in the master in Global Health at the same University.

He is a member of scientific and technical committees relating to environmental and landscape issues: Aida management committee _ Italian Association of Agroecology; Technical Scientific Committee of the Ca'Granda Heritage Foundation; member of the Consorzio Poliedra scientific council of the Politecnico di Milano (DASTU delegation until 2021); member of the scientific committee of the ForestaMi project (nominated by the rector of the Politecnico di Milano).

Between 2011 and 2016 he was a member of the Technical Scientific Council for the revision of the Territory Governance Plan of the Municipality of Milan. Here he worked on the design of ecological networks and the environmental system on a metropolitan scale.

The research and research by design activity has been developed, particularly in the last decade, in close relationship with current urban themes and issues of the city of Milan, actively promoting public initiatives related to the construction of the environmental system and of the parks and public spaces of the city. Many of the research activities conducted in the last decade have touched and promoted these objectives by interpreting the objectives of societal engagement and the third mission of the university.

CURRICULUM

ACADEMIC TITLES

2022	Full professor - Urban planning and design (DASTU)
2021	National Scientific Qualification - Full Professor - sector 8 / F1 Urban and territorial planning and design
2014	Associate Professor - Urban planning and design (DASTU)
2014	National Scientific Qualification - Associate Professor - sector 8 / F1 Urban and territorial planning and design
2008	Assistant Professor in Urban and Territorial Planning and Design
2006	Research grant holder at DiAP, "Tools and methods of communication and representation in strategic planning" (18 months)
2002	Research grant holder at DIAP, "Interpretations and effects of physical design in emerging forms of city and land management and design" (12 + 12 months)
2000	PhD "Pianificazione del Territorio (sedi consorziate Milano, Venezia, Torino)
1994	Scholarship an for international specialization (IRPUD Dortmund), Politecnico di Milano - Ministry of Foreign Affairs
1992	Degree in Architecture (100/100 cum laude) at the Politecnico di Milano

ACADEMIC ROLES

2017 – p.	Coordinator/President of the Msc Landscape Architecture Land Landscape Heritage (2017 - present)
2017 – p.	Member of the Council of the AUIC School – Politecnico di Milano (As Msc Coordinator)
2019 – p.	President of the Graduation Board Landscape Architecture LLH
2015 – p.	Member of the Academic Board of the UPDP Urban Planning Design and Policy Phd program (Phd School of the Politecnico di Milano)

SCIENTIFIC ROLES

2019 – P	Scientific Committee ForestaMi
2018 – p.	board of AIDA ASSOCIAZIONE ITALIANA DI AGROECOLOGIA
2020 – p.	scientific board FONDAZIONE PATRIMONIO CA GRANDA
2014 – p.	scientific board CONSORZIO POLIEDRA DEL POLITECNICO DI MILANO

INSTITUTIONAL ROLES

2008 - 2002	member of the Planning and Landscape commission (commissione edilizia) Comune di Seregno
2005 - 2006	member of the Planning and Landscape commission (commissione edilizia) Comune di San Donato Milanese
2011 - 2016	member of the operative Scientific Board (Consulta Tecnico Scientifica) for the assistance and technical support for the approval of the Land Use and Structural Plan (PGT) of Milano (Comune di Milano – Centro Studi PIM)
2015 - 2016	member of the advisory committee for the drafting of "paesaggi futuri" as technical vision for the green development and management of the city (Comune di Milano – Ass. Verde e Qualità della vita, Ass. All'Urbanistica).

RESEARCH ACTIVITIES

RESEARCH UNDER COMPETITIVE FUNDS

2022 – p.	PALIMPEST – CREATIVE DRIVERS FOR SUSTAINABLE HERITAGE LANDSCAPES Inspired by the idea that territories are "palimpsests" shaped by the stratification of projects and practices that have acted on the natural environment, the project looks at landscapes that make this stratification visible, focusing on three agricultural and urban landscapes called to face significant environmental and climatic challenges. Founded: H2020 – European Commission - New European Bauhaus Partnership: Politecnico di Milano PI + more 25 partners Scientific role: project design, member of the research Group (PI Grazia Concilio DASTU)
2022 – p.	UNLOCK THE CITY! UNLOCK THE CITY! is an international culture-led regeneration project aimed at developing an integrated working method that combines technical scientific and design-oriented research with theatre practice, making the latter a tool to trigger sustainable development processes in the post- pandemic city. Founded: European Commission - Creative Europe Partnership: Piccolo Teatro di Milano (project Leader), Politecnico di Milano, Teatre Lliure of Barcelona, the Teatrul Tineretului of Piatra Neamt and the Toneelhuis of Antwerp, expert academies of Performing Arts and theatrical programming (Østfold University College & Norwegian Theater Academy of Fredrikstad and The Academy of Performing Arts, AMU of Prague). Scientific role: scientific direction, principal Investigator PoliMI
2019 – p.	Rete Ecologica Ca Granda. Feasibility study, pilot actions and investigation of ecosystem services on agricultural (8500 hectares) and naturalistic areas belonging to the heritage of the Ospedale Maggiore in Milan. Funded: Competitive Call "Capitale Naturale Fondazione Cariplo 2019". Partnership: Fondazione Patrimonio Ca Granda, Regione Lombardia – Fondazione Lombardia Ambiente, Parco Agricolo Sud Milano, Politecnico di Milano. Scientific role: research direction, principal inv.
2018 – p.	Re LambroSE (Lambro Sud Est). Feasibility study, pilot actions and investigation of ecosystem services on agricultural and naturalistic areas in the East side of Milan, between the Lambro and Adda rivers Funded: Competitive Call Fondazione Cariplo 2019 Partnership: ERSAF Ente Regionale Agricoltura e Foreste, DASTU Politecnico di Milano, Università degli Studi di Milano, INU Lombardia, CNR, Legambiente Lombardia, Parco Nord Milano. Scientific role: research direction, principal inv with A. Arcidiacono.
2018 – p.	Ex Farb 2018: "Paesaggio, Servizi e Valori" A comparative and transdisciplinary study about the ecosystem services and multidimensional performances in the design and management of peri-urban open spaces. Funded: Competitive call DASTU 2018. Research group: A.Longo, A.Oppio, G.Concilio, F.Manfredini, E.Morello, A.Oldani, C. Dezio (DASTU), con S.Bocchi, S.Corsi (UNIMI), M. Dell'Ovo

	Scientific role: research direction, principal inv
2016	UIA Urban Innovative Actions European Project _ Open Agri Milano _ Urban Innovative Actions, call. FESR. 2015 (2016-2020). Design, planning and startup of an experimental agroecological park in the area of Chiaravalle and Cascina Nosedo in the South East agricultural area of Milan along the Vettabbia canal. Funded: E.U. Competitive Call. Partnership: Camera di Commercio, Industria e Artigianato di Milano, Parco Tecnologico Padano e Fondazione Politecnico di Milano, Università degli Studi di Milano, Politecnico di Milano, Avanzi Srl, Cineca, Future Food Institute, Impatto Zero Srl, La Strada Società Cooperativa Sociale, Sunugal, Poliedra, Ifoa, Mare Srl Impresa Sociale, Food Partners Srl. Scientific role: research direction, DASTU principal inv.
2015	Inclusive Interiors: Spaces of Sociability in an Age of Global Nomadism Research activity on the creation of spaces of sociality, between inside and outside, through the observation of specific social practices and their places. Funded: Farb 2015, DASTU, Politecnico di Milano Funded Research Program Research group: Luca Basso Peressut (coordinator), Anna Barbara, Jaqueline Ceresoli, Simona Chiodo, Lavinia Dondi, Elena Elgani, Imma Forino, Francesca Lanz, Jacopo Leveratto, Antonio Longo, Pierluigi Salvadeo. Scientific role: member of the research group, edr. of a volume (with C. Rabbiosi and P. Salvadeo), develops the theme of non-professional musical practice, in the construction of spaces relationship between inside and outside.
2015	Nuclei Rurali: Cascine, Alpeggi e Città Operational research on the "re-functionalization of Lombard agricultural landscapes through the creation and implementation of cultural networks". Landscape study on the territorial heritage of the Naviglio Pavese and the Valgrigna mountain pastures. Fundend: Competitive Call Fondazione Cariplo Found 2013 (act. 2015). Partnership. ERSARF, Polytechnic of Milan, Lombardy Region, AESR, University of Pavia, Parco delle Risaie Association, 100 Cascine Association, Municipality of Milan. Scientific role: research direction, DASTU principal inv. (con ERSARF e Parco delle Risaie _ Gioia Maddalena Gibelli)
2015	Re Lambro 2 _ Rete Ecologica. Interventi di realizzazione Pilot actions for the re-construction of ecological network. Design and management of flooding areas of the Lambro River, reconstruction of park systems and informal allotment gardens. Funded: Competitive Call Fondazione Cariplo (2015/19) Partnership. ERSARF Regional Agency for Agriculture and Forests, DASTU Polytechnic of Milan, Legambiente Lombardia, Municipality of Milan, PLIS Media Valle Lambro. Scientific role: research direction, DASTU principal inv.
2015	Community Participation in Planning (CPIP) Erasmus+ Milano, Aveiro, Belfast Educational and research activities involving local communities in the promotion of new material welfare infrastructures (Milan project, Grande Parco Forlanini). Funded: E.U. Erasmus +. Research Group: Grazia Concilio (project leader) and Antonio Longo, Talita Medina Amaral, Emma Puerari, Anna Moro (Polytechnic of Milan); Dario Kian (ERSARF) Gianni Dapri Partnership: Politecnico di Milano, Universidade de Aveiro, University of Belfast. Scientific role: research direction with Grazia Concilio at Politecnico di Milano

2012	Re Lambro 1 _ Studio di fattibilità per la rete ecologica del Lambro milanese. Feasibility study and detailed landscape design for the construction of the Lambro ecological system in the urban area between Monza and Melegnano. Fundend: Competitive Call Fondazione Cariplo (2015/19) Partnership: ERSAF Regional Agency for Agriculture and Forests, DASTU Politecnico di Milano, Legambiente Lombardia, Municipality of Milan, PLIS Media Valle Lambro. Scientific role: research direction, DASTU principal inv.
2012	5x1000 fund. Open innovation in urban discovery and planning for the Città Studi Campus _ Sostenibile project. from master plan as alignment environment to urban digital footprints. Activation of public spaces through physical projects and events, integrating urban design activities and curatorial practice. Description and digital monitoring of social aspects. (the project was oriented towards the pedestrianization and transformation of Piazza Leonardo da Vinci during 2013) Funded: Call 5x1000 Politecnico di Milano 2011/12 (With Paolo Ciuccarelli _ Dip. Design) Scientific role: research direction and principal investigator

RESEARCH ACTIVITIES CO-FINANCED BY CONTRACTS

2021	Comune di Livraga (Lodi). Studies for the city center Enhancement, redevelopment, urban, environmental and landscape regeneration with attention to areas in critical and fragile conditions. Research contract: città di Livraga, DASTU Scientific direction: Antonio Longo, with Alessandro Balducci and Michele Ugolini Scientific role: Project management with Michele Ugolini
2017	Metropolitana M4 documento di inquadramento generale e linee guida progettuali Drafting of a framework document on the transformation of the public spaces of the M4 line and the city; as well as project guidelines relating to three stations and related urban areas (Vetra, Sforza Policlinico, Forlanini) Research contract: Metropolitana Milanese (MM) spa, DASTU Research group: Gabriele Pasqui (manager) Piergiorgio Vitillo (direction), Paolo Galuzzi, Francesco Infussi, Marica Fior, Antonio Longo, Laura Montedoro, Laura Pogliani, Paola Pucci. Scientific role: member of the Dastu research group and responsible for the guidelines for the station project, Forlanini/Mezzofanti..
2017	LacittàIntorno. Fondazione Cariplo "LacittàIntorno" is a program of the Fondazione Cariplo that involves the inhabitants of fragile urban contexts in the reactivation and re-meaning of unused or degraded spaces, to improve the quality of life and create "new geographies" of the city Research contract: DASTU, Fondazione Cariplo Research group: Francesca Cognetti (scientific director and coordinator) Elena Donaggio, Daniela Gambino, Jacopo Larena Faccini, Erika Lazzarino With Paolo Grassi, Giada Mascherin, Elena Maranghi and Rosella Ferro, Maud-Lab. Mapping and Urban Data Lab: Fabio Manfredini, Paolo Dilda.

	Scientific role: Member of the scientific board (Alessandro Balducci, Patrizia Gabellini, Antonio Longo, Gabriele Pasqui)
2016	Scali Ferroviari Milanesi Guidelines for the transformation of abandoned railway yards, based on the recognition of the contribution of ideas and expectations of local communities. Research contract: DASTU, Municipality of Milan (Urban Planning Department), Research group: Gabriele Pasqui (manager and coordinator) Gabriele Pasqui, Davide Fortini, Francesco Infussi, Paolo Galuzzi, Antonio Longo, Laura Montedoro, Corinna Morandi, Paola Piscitelli, Laura Pogliani, Piergiorgio Vitillo. Scientific role: Member of the research group
2016	Orti Metropolitan Research activity on the specific and large scale dimensions, production and landscape and socio-cultural characteristics of family gardens and formal and informal allotment gardens of the Metropolitan City of Milan. Research contract: Cariplo Foundation 2016 "Extra Bando Financing 2016-2018". Partnership: Italia Nostra Boscoincittà, DASTU Polytechnic of Milan, Agricultural School of Monza, University of Milan DEMM; Scientific Role: Scientific direction
2012 - 2016	Bioregione Research on production, local consumption cycles and the Lombard territory considered in a Bioregional perspective. Research contract: Cariplo Foundation 2012 and 2016 "Extra Bando Financing". Partnership: DISAA University of Milan and DIAP / DASTU Polytechnic of Milan Scientific Role: Scientific direction at DASTU since 2015
2010	Riforma degli spazi aperti e degli spazi urbanizzati nella Provincia di Monza e della Brianza. Project for the protection and reform of the open space systems of Brianza and Vimercatese affected by the transformations induced by the construction of the new Pedemontana Lombarda motorway. Research contract: Politecnico di Milano DIAP, Provincia MB Research group: A. Ali, A. Bortolotti, D. Gambino, A. Lanzani (coordinator), A. Longo, Morello. E., A. Moro, C. Novak, L. Valtorta; F. Zanfi Scientific role: member of the research group, scientific direction with A. Lanzani, C. Novak.
2008	Dorsale Verde Nord Milano. Project for the system of the open spaces (area pedemontana lombarda) developing a landscape study of the "Dorsale Verde Nord Milano" and edit a "local guide" intended as a strategic planning tool for local communities. Research contract: Provincia di Milano/DIAP Research group: A. Longo, A. Lanzani, C. Pacchi, P. Pileri, C. Calvaresi, C. Novak. Scientific role: member of the research group. Landscape design of the Dorsale Verde
2005	Progetto strategico Città di Città. Provincia di Milano/DIAP.

	Strategic plan for territorial governance, design of an atlas, management of pilot projects through public tenders. A line of research has been developed on territorial representation and communication of the project which has merged into the production of materials and curatorship of the exhibition set up at the Milan Triennale. Research contract: DIAP Politecnico di Milano, Provincia di Milano Research group: Alessandro Balducci (coordinamento) in collaborazione con Gabriele Pasqui e Valeria Fedeli. Paolo Bozzuto, Antonella Bruzzese, Claudio Calvaresi, Ida Castelnuovo, Bruno Dente, Matteo Bolocan Goldstein, Paolo Fareri, Daniela Gambino, Marianna Giraudi, Arturo Lanzani, Antonio Longo, Fabio Manfredini, Anna Moro, Carolina Pacchi, Paolo Pileri, Paola Pucci, Giovanni Scarton Scientific Role: Director of the representation and communication of the Plan, curator of the ViviMi Exhibition (Triennale di Milano May June 2007).
2005	Mercato Urbano e Sfera Pubblica. MilanoltreMilano Research on the outcomes and processes of urban real estate change and the urban market between the 90s and 2000s in Milan Research contract: Consorzio Metis (Politecnico di Milano), Euro Milano s.p.a. Presidency of the Province of Milan, Hines Italia s.r.l., Mondo Immobiliare Il Sole 24 Ore, Parisi Ferrandi, Skira Editore. Research Group: Matteo G. Bolocan (scientific direction and coordination) with, Angelo Armentano, Bertrando Bonfantini, Silvia Botti, Guido Codecasa, Andrea Di Giovanni, Luca Gaeta, Antonio Longo, Valeria Lupatini, Gabriele Pasqui, Roberto Ricci, Paolo Riganti Scientific role: Member of the research group, interpretation of the evolution and adaptation of large urban projects
2003	Métropole Nature, Les espaces naturels périurbains e la ville durable. Involvement of institutions and stakeholders in a study on the governance of Milanese periurban parks and construction of a guide within the European Interreg Medoc project, DIAP Politecnico di Milano / Province of Milan Research contract: Province of Milan, DIAP Politecnico di Milano. Partnership: cities of Lille, Barcelona, Genoa, Grenoble. Research group: Alessandro Balducci (direction), Claudio Calvaresi, Dario Domante, Caterina Gfeller, Antonio Longo, Elena Milanesi, Carolina Pacchi, Roberto Ricci, Rosanna Ridenti, Francesca Santaniello Scientific role: member of the research group and editor of the final "governance guide" research report

RESEARCH ACTIVITIES ON ASSIGNMENT AND CONTRACT AND OTHERS A.

2019	Marcite di Norcia Strategic and operational framework and landscape project for the recovery, accessibility and enhancement of the territorial area of the ecosystem of wet pastures near the walls of the ancient center. Contract: Città di Norcia, DASTU Scientific responsibility: Antonio Longo, with Alessandro Balducci. Working group: Irene Toselli, Carla Ferrer Lorca Scientific role: Strategic and landscape project management
2019	Parco dei Gasometri del Politecnico di Milano-Bovisa Design of the Gasometri Park in the development area of the new university campus of the Bovisa-Politecnico in Milan. Scientific project consultancy carried out as part of the Vivi Polimi project promoted by Politecnico di Milano under the strategic and technical direction of the Milan Vice Rector Emilio Faroldi

	Scientific role: scientific consultancy Antonio Longo, with M.P. Vettori and Matteo Poli
2017	Politecnico Bovisa. Un parco per la ricerca e il lavoro. dieci progetti della Call for Ideas del Politecnico di Milano. Internal call of the Politecnico di Milano for planning and landscape projects of the areas of the Politecnico alla Bovisa Project team: Angelo Bianco, Paolo Bozzuto, Antonella Bruzzese, Andrea Di Franco, Ettore Donadoni, Luca Gaeta, Stefano Guidarini, Francesco Infussi (scientific direction), Isabella Inti, Antonio Longo, Chiara Merlini, Laura Montedoro, Paolo Oliaro, Davide Premoli, Paola Pucci, Pieluigi Salvadeo. Scientific role: member of the design team
2014	Revisione del Piano Paesaggistico Regionale Lombardo – Assistenza tecnica Consultancy and scientific technical support for the revision process of the Landscape Plan of the Lombardy Region Research contract: Regione Lombardia - DASTU - Scientific direction: Andrea Arcidiacono, Emilio Guastamacchia (DASTU) - Scientific role: responsible for organizing and conducting thematic seminars aimed at expanding the reference framework and objectives, with Alessandro Rocca
2013	Torino Strategica Accompaniment and consultancy for the Strategic Planning process of the city of Turin. Contract: DIAP / DASTU, Torino Strategica Scientific direction: Gabriele Pasqui with Claudio Calvaresi (IRS) Scientific role: member of the working group and responsible with Andrea Rolando of strategic urban and regional images
2012	Comune di Castelli Calepio: PGT 2012 Technical assistance and scientific advice for the drafting of the PGT (structure and land use plan) of the Municipality of Castelli Calepio (Bg). Contract: Comune di Castelli Calepio / DIAP-DASTU Scientific responsibility: Antonio Longo with Andrea Gritti, Antonella Bruzzese Scientific role: project direction and management with Andrea Gritti and Antonella Bruzzese
2011 - 2016	Comune di Milano: PGT 2011/12 Activity carried out as a member of the scientific board for the 2011-12 revision of the PGT (Structure and Land Use Plan) of the Municipality of Milan Contract without charge: Centro Studi PIM on behalf of the Comune di Milano. Technical and Scientific Committee: Andrea Arcidiacono, Maria Berrini, Matteo Bolocan Goldstein, Giovanni Dapri, Paolo Galuzzi, Antonio Longo, Stefano Pareglio, Laura Pogliani, Pier Giorgio Vitillo. Scientific Role: scientific advice and revision of the Plan and the structure of the Public City and of the Ecological and Environmental Networks.
2010 - 12	Cinisello Balsamo: PGT 2010

	Sudy for the land use and deveolpment rules, and consultancy for the planning of the Land Use Plan. Contract: Municipality of Cinisello Balsamo / Politecnico di Milano DIAP. In collaboration with the DPA Department and the PIM Study Center. Scientific direction: Antonio Longo, Mariagrazia Folli (DPA) Scientific role: technical and scientific direction
2010	Linee guida per il recupero di cave e discariche in Lombardia Project for the landscape recovery of quarries and landfills as a guideline for the implementation of the Regional Landscape Plan. ERSAF Convention, Lombardy Region Politecnico di Milano DIAP Scientific direction: Arturo Lanzani, Antonio Longo, Paolo Pileri (DIAP / DASTU) Scientific role: project for the landscape recovery of the quarries
2008	Cernusco sul Naviglio. PGT 2008 Concept and develop of the city Plan (PGT) in its three components (Structural and strategic Plan, Land Use Plan, Service Plan and strategy). Management of the process from the first guidelines to final approval. Contract: Città di Cernusco sul Naviglio, Consorzio Metis (DIAP) Politecnico di Milano (in ATI with UbiStudio Srl and TRT Trasporti e Territorio, Avanzi srl) Scientific Responsibility: Antonio Longo and Alessandro Ali Scientific role: Scientific direction of the project and with Alessandro Ali (UbiStudio srl) for the technical direction
2007	Compensazioni ambientali per l'autostrada Pedemontana Lombarda Studies and research for the landscape project and the compensation works of the new Pedemontana Lombarda motorway (2007- 2008) Contract: Politecnico di Milano DIAP, Società Pedemontana Lombarda Spa / DIAP Scientific direction: Arturo Lanzani, Antonio Longo, C. Novak Scientific role: Scientific direction and landscape design, with A. Lanzani, A. Ali, C. Novak
2005/6	Progetti Abitare a Milano 1/2 Masterplan for the open competition for 8 public housing projects in Milan. Study and design of masterplans included as guidelines for building development and placement in the urban context. Contract: Comune di Milano / DiAP - 2005 Scientific direction: Francesco Infussi (DIAP / DASTU) Scientific role: masterplan development and project layout (with Lorenzo Fabian and Gabriele Rabaiotti)
2005	Progetto sistema Corridoio Esino Strategic scenarios at the regional scale to support the project of the strategic infrastructure and environmental corridor Corridoio Esino Contract: Comune di Jesi (on funds from the Ministero Infrastrutture e Trasporti) , DIAP Politecnico di Milano Scientific direction: Patrizia Gabellini , Research Group Prg Unit and Special Projects - Municipality of Jesi (2005-2007) Scientific role: representation of the strategic scenarios
2005	

	Documento strategico di inquadramento e Piano di Governo del Territorio di San Donato Milanese e PGT San Donato Milanese Study and projects for the new strategic framework document and the new PGT structure and land use plan (Piano di Governo del Territorio). Contract: Municipality of San Donato Milanese / DiAP Scientific Responsibility: Alessandro Balducci, Francesco Infussi (Politecnico di Milano - DiAP) Scientific role: Member of the research group and responsible for the activity for the Strategic Framework document
2003	Progetto del Piano Regolatore di Jesi (AN) Collaboration in the drafting of the PGT and application for funding for the District Contract of the Ancient Center. Contract: Municipality of Jesi / DiAP Scientific direction: Patrizia Gabellini Scientific role: member of the working group, development of specific project themes (Zipa Verde and "contratto di quartiere" of the Historical center),..
2002	Programma Urban Italia, Cinisello Balsamo Guidelines for the definition of a call for project financing for the construction of a multi-functional sports park in an abandoned area Contract: Municipality of Cinisello Balsamo / DiAP, Scientific direction: Alessandro Balducci Scientific role: responsible for urban and landscape design
2000	Piano Strategico Nord Milano Strategic Plan for the North Milan Area promoted by ASNM, Agenzia Sviluppo Nord Milano Agency. Contract: ASNM Agenzia Sviluppo Nord Milano _ Development Agency / DiAP, Politecnico di Milano and CDRL Scientific direction: Alessandro Balducci Scientific role: development of the spatial themes and the representation of the strategic lines of the Plan and the system of open spaces and new centralities.

Paper: *Rappresentare il cambiamento: immagini del territorio e raffigurazione. Alcune note a partire dall'esperienza del Piano strategico del Nord Milano* (with Claudio Calvaresi)
Trento 13-14. 2. 2003

TEACHING ACTIVITIES

COURSES AND STUDIOS HELD AS ADJUNCT PROFESSOR (1999-2008)

The teaching activities carried out before being Assistant and, later, Associated Professor mainly concerned the integration between the practice of drawing and representation and urban, territorial and landscape design. The name of the courses was variable according to the management needs of the courses and relatively independent of the detailed content of the courses which maintained a link between the conception and formalization of the urban, territorial and landscape project. In the following list, the courses and laboratories have their original names (which indicate whether they were taught in English).

AA. 2007 - 2008

Integrated Studio, **Progettazione urbanistica** (Msc in Urban Planning and Policy Design, Scuola di Architettura e Società, Politecnico di Milano) (sect. a.) Patrizia Gabellini (Sez. coord.), Bertrando Bonfantini, Antonio Longo.

Disegno urbanistico (6 cfu)

Integrated Course, **strumenti e tecniche di rappresentazione** (Corso di Laurea in Urbanistica, Scuola di Architettura e Società)

Disegno del piano (4 cfu)

AA. 2006 - 2003

Disegno urbanistico (Scuola di Architettura e Società, Msc in Pianificazione Urbana e Politiche Territoriali, Scuola di Architettura e Società, Politecnico di Milano)

Integrated Course **Tecnica e disegno del Piano** (Bachelor in Urbanistica, Scuola di Architettura e Società, Politecnico di Milano) (sect. Coord.)

Disegno del Piano

AA. 2002 - 2003

Laboratorio integrato di progettazione urbanistica (Prof. Chiara Merlini)
Università di Camerino - Corso di laurea in Architettura presso Ascoli Piceno
Progettazione del paesaggio (2 cfu)

Integrated Course **Tecnica e disegno del Piano** (Bachelor in Urbanistica, Scuola di Architettura e Società, Politecnico di Milano) (sect. Coord.)

Disegno del Piano

AA. 2001 - 2002

Integrated Workshop) integrato di progettazione urbanistica (Prof. Chiara Merlini)
Università di Camerino - Corso di laurea in Architettura presso Ascoli Piceno
Progettazione del paesaggio (2 cfu)

Integrated Course **Tecnica e disegno del Piano** (Bachelor in Urbanistica, Scuola di Architettura e Società) (sect. Coord.)

Disegno del Piano

AA. 2000 - 2000

Integrated Course **Tecnica e disegno del Piano** (Corso di Laurea in Urbanistica, Scuola di Architettura e Società, Politecnico di Milano)

Disegno del piano (4 cfu)

COURSES AND STUDIOS HELD AS ASSISTANT AND ASSOCIATE PROFESSOR (2008-2021)

The teaching activity is developed through four main themes strongly connected with the research lines:

- the setting of specific skills in **drawing and communication**, in particular for Bachelor's students in Urban Planning. The teaching method has been refined through "processes" that connect different techniques and tools of representation and communication (from GIS data management to communication and post-production, rendering and layout)
- **Urban planning and design in contemporary cities and regions**, considered as a set of consolidated techniques and practical knowledge and, at the same time, as a field of research by design. The design/teaching activity offered to the students is based on the critical construction of the context, reinterpretation of case studies and projects. The best results manage both land use and regulation and design (layout and urban design). Designing projects and Plans in the face of complexity is considered as a fundamental condition for the planner's training.
- **Testing innovative forms of urban design**, which mix design and curatorial practice. The approach was proposed in the final thematic workshops developed between 2012 and 2016 (also in relation with the 5x1000, Erasmus + and Farb research project), using the city as a laboratory for the activation of

public spaces and for change, the production of prototypes, the involvement of citizens. (Thematic Workshop)
 - **Landscape ad a transdisciplinary field.** Landscape design courses within the new MSc in Landscape Architecture LLH, balancing environmental issues, aesthetic and performance aspects in highly transdisciplinary landscape projects

AA. 2020/21

Laboratorio di urbanistica (Bachelor in Architecture, AUIC Politecnico di Milano) Cristina Renzoni (coord.) Antonio Longo
Analisi della città e del territorio (4 cfu)

Open spaces system and parks design studio (Msc in Landscape Architecture _ Land Landscape Heritage AUIC Politecnico di Milano) (sect. coord.) Antonio Longo, Gabriele Cola, Andrea Oldani
Urbanism and landscape (4 cfu)

Urban Planning and Design Studio (Msc in Urban Planning and Policy Design, AUIC Politecnico di Milano) (sect. coord.) Antonio Longo, Matteo Motti
Urban design (6 cfu)

AA. 2019 – 2020

Urban and rural open spaces networks and parks design studio (Msc in Landscape Architecture _ Land Landscape Heritage AUIC Politecnico di Milano) (sect. coord.) Antonio Longo, Gabriele Cola, Andrea Oldani
