

CITY WATER CIRCLES NEWSLETTER

JUNE 2022

Dear Reader,

In June 2019 the City Water Circles team started the project with a kick-off meeting full of hope and optimism.

After 3 years, we closed it with the same enthusiasm, but with much more knowledge and experiences. We hope our project outputs - the Digital Learning Resources, the Transnational CWC Handbook, experiences harvested from the pilot interventions, the FUA level and transnational circular water management strategies and action plans - contribute to the European empire of knowledge.

The water circle is closing but will never end.

FINAL CWC CONFERENCE - INFOPACK

The final conference of the European City Water Circles project on sustainable, circular urban water management was held in Split, Croatia on 9th June. The aim of the event was to summarise and present the main outputs of the project, to share the experience and knowledge base, gathered and build by the project participants.

[HERE you find](#) the presentations of the final conference.
